Dear SSC LT,

To complete an action from the last conference call ? and facilitate discussion in our next conference call ? please see below a list of the metrics currently monitored by the SSC Metrics Sub-team and their recommendations:

1. Supplier Voting Member activity on Task Group ballots (tracked overall and per Task Group)
  - a. Recommendation: value-added and has an impact ? continue to monitor
2. SSC LT attendance at SSC LT conference calls and face-to-face meetings
  - a. Recommendation: this has remained consistently over 75% since the metric began ? discontinue monitoring
3. Number of supplier companies represented at Nadcap meetings
  - a. Recommendation: not value-added and no action has ever resulted from this metric ? discontinue monitoring
4. Number of individual supplier delegates represented at Nadcap meetings
  - a. Recommendation: not value-added and no action has ever resulted from this metric ? discontinue monitoring
5. Number of individual supplier delegates represented at SSC activities (eg Supplier Tutorial and SSC meeting) versus how many supplier delegates are at the Nadcap meeting
  - a. Recommendation: value-added although no action has ever resulted from this metric ? continue to monitor

For metrics 1 ? 5, please consider the value of continuing to monitor the data, and if it?s decided to continue to monitor the data, what goal/s should be put in place to evaluate success.
